## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duncan, 2007/0226481, in view of Worrell et al., 2005/0021190.
- 4. Duncan discloses wherein the device is operable to read a memory card that can be inserted into and removed from the device, the card storing the device operating system, the application, and the data, the device does not store its operating system in internal ROM but instead reads if off from the memory card, the memory card is a SD card in paragraphs 61-66; internal XIP (execute In Place) Flash ROM programmed with a boot loader in paragraph 55; boot loader prompts for the user to insert the supplied

memory card in paragraph 66; the user inserts the memory card, it copies a special system file from the memory card into RAM, the system file including the operating system and the navigation application in paragraphs 61-66; programmed so that once copying of the system file is complete, control will be passed to the navigation application, which starts and accesses non-volatile data from the memory card in paragraph 66. that when the device is subsequently switched off, the RAM contents is preserved so that the boot up procedure only has to occur the first time the device is used in paragraphs 61-66. Duncan does not disclose the application is a navigation program and the data is map data. Worrell et al. teaches the application is a navigation program and the data is map data used on a flash memory in paragraph 70. It would have been obvious to one of ordinary skill in the art at the time the invention was made to update any type of computing device, including Worrell's navigation device, using the device and method because it is made to be used on various devices that may be outdated by the time an end user receives them. Maps and programs get updates regularly, however, devices may be manufactured months before they reach an end user. The combination of the two pieces of prior art result in a predictable outcome to one of ordinary skill in the art.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN J. BROADHEAD whose telephone number is (571)272-6957. The examiner can normally be reached on Monday through Thursday or Tuesday through Friday.

Application/Control Number: 10/598,889 Page 4

Art Unit: 3664

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Khoi Tran can be reached on 571-272-6919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
